

MH370 ICO White Paper

***What does the theft of billions of dollars by corrupt officials of the Malaysian government and the inhuman forced harvesting of transplant organs from LIVE Falun Gong prisoners of conscience by the Chinese government have to do with the disappearance of Malaysia Flight #370?
EVERYTHING!!***

From Executive Producer - Darlene Lieblich Tipton

In a typical White Paper, you would be flooded with many pages of fancy eye-catching graphs, charts, and tons of text -- much of which is the same information told twelve different ways. The purpose is to give you as much information as possible to make an informed decision about purchasing their token.

However, each White Paper comes with tons of finely crafted bullshit that inundates you with details designed purely to give you a feeling of competence and security. I hope to accomplish that honestly in my no-bullshit approach to this White Paper. That fact is, you really aren't investing in my cryptocurrency token. You are investing in me.

My entire life has been dedicated to doing the best I can and doing the right thing whether it is popular or not, while maintaining the highest degree of personal responsibility and integrity.

These two links will give you a better idea of who I am.

[BIOGRAPHY](#)

[ENDORSEMENTS](#)

Making a movie is not brain surgery. All it takes is money. Once the funding is in place, the entire process begins. It is my personal and business responsibility as the Executive Producer to hire the best movie production talent possible, from producers and unit production managers, casting director, and the rest of the film production specialties.

Publicity through normal channels, as well as heavy social media marketing, will start to bring the production to the attention of the world. It is at this point that the MH370 token should start to increase in value due to the fact that almost everyone on the planet is interested in what really happened to Malaysia Flight #370.

The next step is to attract and sign a well-known Director and lead cast. A-List talent such as Director Martin Scorsese along with well-known actors Brad Pitt, Harrison Ford, Sharon Stone, Richard Gere, Lady Gaga, and others have been banned from China because they dared to make movies critical of China's horrendous human rights abuses. They will be our first choices. The following link gives more information on talent banned by China.

[Stars Banned in China](#)

As much publicity as possible will be generated as star talent attaches to the production. While I can't guarantee that the MH370 token will increase in value, it is clearly possible as these celebrities use their social media presence to garner even more publicity. Even bad publicity can be a good thing. If China were to complain about the project, it would multiply the world-wide interest tremendously.

Once the movie is completed the next step is to get it into the best film festivals such as Cannes, Berlin, Toronto, Sundance, etc.

[Best Film Festivals](#)

Film festivals are where the publicity really kicks in and where the value of your MH370 token has the best chance of increasing in value. If the movie garners various film festivals, which includes the possibility of winning a Golden Globe or even an Oscar, the publicity will sky-rocket and the potential increase in value of your tokens would also rise.

Who is our Target Investor?

The MALAYSIA 370 movie exposes the brutal persecution of Falun Gong practitioners in China.

[Video of China's Persecution of Falun Gong](#)

As of January 1, 2019, there is an estimated 110 million Falun Gong practitioners in China and another 65 million world-wide. Although China has banned the sale and use of cryptocurrencies, Chinese investors have been able to circumvent the ban by using various VPN networks.

In addition, Human Rights Watch and the Human Rights Commission add tens of millions of world-wide supporters eager to free Chinese citizens from persecution and censorship.

This movie project is so much more than just a potentially lucrative investment. My primary goal in making this movie is to save hundreds of thousands of innocent prisoners of conscience from having their organs ripped from their bodies, with no anesthesia, and transplanted into ailing Chinese Communist Party members and wealthy people from around the world.

The Chinese On-Demand organ transplant program is a fact and has been documented many times by governments and private human rights organizations for decades.

However, the entire world has ignored these reports, and enabled the Chinese government to continue their butchery because of strong financial ties to China, even when that revenue results from the murder of innocent men, women and children.

There is another reason to fund this movie by ICO and again, it involves China. The majority of movie financing comes from China so they can control production from development through distribution. China dictates what can be made and what can't be made to protect their human rights abuses, which benefits the Chinese Communist Party and its members. While Westerners commonly believe that all Chinese citizens are members of the Communist party, in actuality party membership comprises only 6% of China's population.

MH370 ICO and TOKEN

The world of cryptocurrency has continued to grow since Bitcoin was incorporated in 2008. Since the creation of bitcoin, other coins, christened 'Altcoins', have continued to be created, from Ether to Dash. Since a lot of coins exist, it is hard to choose which to buy, especially among Altcoins.

Most people prefer to buy the most well-known tokens or coins. For a new coin to gain acceptance, it must have something special attached to it, which is where MH370 coin comes in.

The term 'MH370' is the legal call sign of the Malaysia Flight #370 that disappeared on March 8, 2014 with 239 passengers and crew.

The MH370 coin provides a compelling reason to finance the movie that will tell the true story of who hijacked the plane, why the plane was hijacked, what went wrong, and why the governments of China, Malaysia, and the United States have not released their intelligence reports regarding the missing plane and the 239 souls on board.

Producing the true story about the disappearance of Malaysia Flight #370 is a challenge worth risking my life for. I will continue my work and complete this project successfully regardless of the constant harassment, intimidation, and even death threats by those who have much to lose when the movie comes out.

With your help, we can educate the world through entertainment and help stop the misery of millions of innocent Chinese people.

PLEASE help by investing in the MH370 token not only to make money for yourself, but more importantly, because it is the right thing to do in exposing China's brutal treatment of its innocent citizens.
